

Payment Policy

ShopFlow · internal demo document

Captured payment with failed order:

Support must verify the exact payment and order records. A CAPTURED payment paired with a FAILED order requires reconciliation by the payment workflow or engineering escalation; support must not claim the payment is lost.

State	Permitted next step
CAPTURED + FAILED	Request callback reconciliation; escalate if replay fails
Unknown payment	Mandatory security escalation; make no account change

Authority limits:

Support may prepare a response and request review. Support cannot capture, void, refund, or alter a payment.
